### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/27/2009 has been entered.

The pending claims were discussed with applicant's representative, Astrid R. Spain around 06/22/2009. Insofar as applicants thereafter did not contact Examiner to inform whether the suggestions to amend the claims to allowable form are acceptable, the following Office action was deemed necessary.

### ***Status of the claims***

Claims 26,27 are amended to remove "comprising " language. New claims , claims 41-56, are added, which are parallel to previously examined claims 25-36 but are directed to conjugates of substance P analogs addressed using the "comprising" language now removed from claims 26,27. Also claims 37-40 are added which are directed to polypeptide that inhibits protein synthesis.

Claims 25-56 are pending.

***Claim Rejections - 35 USC § 112 (New matter)***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 41-56 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. Claims 26,27 entered as Preliminary amendment on 03/30/2004, and now claims 41-56 (which inherited the “comprising ” language of now amended claims 26,27) introduce new matter as they address substance P as “comprising” SEQ ID No. 1 or SEQ ID No. 2. Specification discloses substance P analog which is a peptide of SEQ ID No. 1 or 2 (as addressed now in claims 25-27, for example, but does not disclose a broader genus of substance P analogs comprising SEQ ID No. 1 or SEQ ID No. 2.

***Double Patenting***

The double patenting rejection of record over claims of U.S. Patent No.6063758 is now moot in view of filing a Terminal Disclaimer.

***Conclusion***

Claims 25-41 are allowed.
